### Re: Submission to JCGS

Dear Professor Lee,

Please find attached our latest revision of "Signs of the Sine Illusion - Why we need to care". We have addressed the typos and grammatical errors noted by one of the reviewers and have also shortened the paper significantly. As a result, we did not have room to include a head-to-head comparison of the dual-plot approach versus the corrected approach suggested in the reviews. However, we feel the space constraints of this publication (which are common) provide an additional example of a situation in which multiple graphs may be inappropriate.

We hope that this revision adequately addresses your concerns as well as those of the reviewers.

Sincerely,

Susan VanderPlas  
Iowa State University

Heike Hofmann  
Professor of Statistics
